## **Construction Underway!**

**As you have been aware, we have been planning an additional storage to our facility. After many a 'bump in the road', we have begun construction.**

**When completed, we will have easily accessible range storage as well as a small instructional area.**

**This addition is the first expansion to our facility since we were built in 1983.**

**And for those who are curious, what did 1982-83 construction look like?**

**The next pages show a summary of our build in 1982-83. Followed by some photos of this year's building project.**

# PAINTERS NEEDED!

In order to keep our building costs down, we removed painting from the contract to build. Thus, we need our members to step up to offer to help prime/paint/clean up the addition after it is built. We need experienced painters and helpers to complete the building project. IF you can help, please leave your name and membership number with our range staff. We expect that painting will take place around early October.

Please consider offering your help to your club.
